

Our recent call to be a Petition Watcher is paying off. Many of you are reporting where you are finding petitioners, what they have been saying, sending us photos of the activity so we can check for compliance, etc.

Kudos to one of our followers who took our request to heart and successfully had a signature gatherer removed from outside a popular eating/drinking establishment. After being approached by the petitioner, our follower went inside to see if management was aware of the situation. Turns out the manager was lied to by the petitioner about their purpose for being there (no surprise there!) and didn't realize they were participating in political activity. Once the manager was convinced to go out and see what was taking place, they promptly made the petitioner leave.

Our follower did everything right when approaching management. She didn't ask them to take sides, but convinced them that people don't want to be harassed by political petitioners when they enter a business and it's bad for business to appear to support a political issue. And not only did she inhibit the petitioner from gathering signatures at that location, this kind of action can demoralize HSUS's small pool of volunteers.

So YOU can make a difference. TAKE ACTION now and we WILL stop HSUS from causing irreparable damage to Arizona's wildlife.

Contact us at info@azsfdc.org with any questions or information.
