Summarize Project Accomplishments : The smaller 500 gallon trailer will allow smaller trucks to supply water to tanks. The larger 1,000 gallon tank a ¾ ton diesel truck to pul it. These trailers are expected to be utilized very heavily this summer. We buy all the components and assemble the trailers ourself. This saves money and allows us to have a customizable trailer for our needs

Measurable Results (Fill in all that are applicable):

Attendees (If project was an event, list total # of participants, excluding staff, visiting parents, etc): _____

Visitors (If the project is an interpretive display, list total # of annual visitors): _____

Brochures, Pamphlets, etc. (If the project is a brochure, publication, poster or video, list the total produced and distributed): _____

Other (please explain): These trailers are for a water hauling trailer for Wildlife. We have already hauled tens of thousands of gallons to Arizona G&F trick tanks, due to the lack of precipitation, since we bought them. This trailer will be used heavily over many years, and has the AZSFWC logo on the side..
